The main topic of discussion was the future role of the P.M.B. after 1990. The Consortium have instructed all organisations, including S.P.T.A. to submit their own views about the role the P.M.B. should play after 1990. Our report from the S.P.T.A. to be with the Secretary of the Consortium prior to the date of its next meeting.

State of the Crop. Far more sprouting in English ware potato stores caused by mild weather. Producers still loading heavily on to markets with prices easing.
